

ACUFLO

Mini Toby valve Box Range

ATC160

Large 160mm lid for easy access
Large stabilizing flange for added component security
Lid has metal detection rod and points service line direction
Stainless steel flexible cable to secure lid to box

Standard 150mm storm water PVC pipe can be fitted inside Toby
Pipe can be cut to length to suit valve depth

ATB160

Inter connecting storm water pipe fits over the base and is located in position with a slotted housing on the outside of base
Use of the base avoids build up of spoil and worm casts covering the valve in the future.

The base provides a firm seating for the cover and inter connecting pipe without impinging on the valve or service pipe.
